Cherub Modeling Pedal

CHERUB TECHNOLOGY'S new Nu-X MG-100 multi-effect modeling guitar processor features a large, easy-to-read color TFT LCD panel and a total of 55 effects models including 12 classic tube amp models, 11 cabinet models, vintage three-band passive EQ modeling for every amp model, and six-band graphic EQ designed specifically for electric guitar (100Hz, 200Hz, 400Hz, 800Hz, 1.6kHz, 3.2kHz). Up to eight effects can be used simultaneously, and 36 of the total 72 presets are user defined.

A 40-second phrase loop with sound on sound adds more playability. The assignable expression pedal facilitates adjustment of volume or effect parameters in real time. Topping off this feature-laden pedal is a built-in drum machine with CD-quality PCM sounds.

▶VOCOPRO DUAL CHANNEL UHF WIRELESS MIC SYSTEM

SMALL IN SIZE—and price—but big in sound, VocoPro's new UHF-28 Professional Dual Channel UHF Wireless Microphone System is the world's smallest two-channel UHF wireless mic system. What's more, it features the same technology as VocoPro's popular four-channel UHF-5800 system to ensure great quality sound for vocals and speech.

The UHF-28 System includes one UHF-28 receiver unit, two wireless mics, a 1/4" patch cable, power adapter, and instruction manual. The system can be used as a plug-in device or independently. Its UHF antennas connect securely with BNC plugs. Other features include volume controls with power switch, 1/4" mic out, and DC input for independent operation. It fits
